Einweg-Ersatzbezüge EasyReach #MEQT0001

pure[11]-Nr.: 1110226, Marke: Contec

Eigenschaften

- Marke: Contec
- Breite in cm: 19 cm
- Art des Moppwischbezugs: Flachmopp
- Gewicht in g: 20 g
- Gebrauch: Einweg
- Material: Polyester
- Anzahl in kleinster Unterverpackung: 4
- Polyester/PES: 100 %
- Vorgewaschen

Empfohlene Reinraumklassen

Passend für Artikel 10321/10322 / VE: 60STK

EasyReach Cleaning Tool

Versatile, lightweight tool for isolators, RABS, UDAFs

The cleaning and disinfection of isolators, Restricted Access Barrier Systems and Undirectional Airflow Cabinets can often be a difficult task. Designed with operator or product safety in mind, they are not always easy to decontaminate. The **EasyReach Cleaning Tool** was specifically created for this application.

It's rectangular shape makes overlapping straight-line action easy to achieve. A hinged joint along with the ability to lie flat makes this lightweight tool comfortable and easy to use for accessing hard-to-reach areas. The EasyReach Cleaning Tool is available with a choice of fixed or telescoping handles to provide versatility for all sizes of minienvironment.

The 100% laundered polyester pads are designed to yield only a low level of particulates which is essential for use in product contact areas. The single-use, multi-layer cleaning pads are very absorbent, ensuring good even coverage of disinfectant or IPA. The easy grab edge on the cleaning pad ensures the pad fits tightly on the mop frame but is easy to replace with gloved hands.

The unique, presaturated pads make the task of cleaning and disinfecting an Isolator or RABS even easier as no spray bottles need to be passed into the controlled environment, and exactly the same amount of fluid is used by each operator.

EasyReach Cleaning Tool

FEATURES	BENEFITS
Lightweight stainless steel frame and handle	• Suitable for single handed operation, reducing operator fatigue and encouraging compliance. • Autoclavable; can be sterilised by most common methods including gamma irradiation, ethylene oxide, or autoclave (recommended cycle is 121°C for 30 minutes).
Pivoting head with rounded edges and slim profile	• Easy to manoeuvre and ensures even the most awkward areas can be reached while maintaining good contact with the surface. • Ensures there is no possibility of scratching the surface.
Fixed length or telescopic handles	• Short handle 40cm allows transfer into smallest transfer hatches. • Telescoping handles provide versatility for cleaning in large RABS, half suits or incubators minimising the chance of strain through over-reaching.
Rectangular shaped head	• Ideal for correct technique of cleaning and disinfecting with overlapping parallel strokes.
Choice of dry or presaturated 100% 2-ply knitted polyester pads	• Extremely low levels of particles and fibres so suitable for grade A/ISO Class 5 zones. • Provides high level of sorbency for even application of fluids. • Strong and durable with good abrasion resistance. • High level of chemical resistance, compatible with a wide range of disinfectants.
Presaturated with 70% IPA	• Easy to use, ensures the correct amount of solution is used each time by each operator. • Eliminates the need to take bottles into to critical zone.

EasyReach Cleaning Tool

The EasyReach Cleaning Tool is available in two options.

2665LF One-piece stainless steel frame with integrated handle.

2685LF EasyReach Stainless Steel mop head frame with QuickConnect system so can be used with any QuickConnect handle.

The "LF" frame can lay flat to get behind any fitted equipment or hanging rails in the mini-environment.

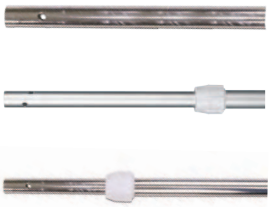

The EasyReach mop head frame can then be fitted with a choice of dry or presaturated cleaning pads.

2685LF

The most popular handle options are:

2686 One piece stainless steel 40cm
2642 Aluminum extending handle (40cm to 75cm)
2644 Stainless steel extending handle (40cm to 75cm)

2665LF
