PROSAT Polynit Heatseal Wipes

100% knitted polyester presaturated with 70% IPA

PROSAT® Polynit Heatseal Wipes are manufactured from 100% knitted textured polyester with laser-cut sealed edges for very low levels of particles and fibres. Polyester wipes are chemically resistant and exceptionally low in particles and fibres. An interlock knit creates a durable fabric, the addition of a periodic additional stitch of a no-run interlock knit prevents the fabric unravelling creating an even more durable fabric with strong edges.

The wipes are laundered and packed in a cleanroom. Through years of continuous improvement, we have created processes that minimise nonvolatile residues (NVRs) and particles, yet result in a sorbent wipe with excellent functionality.

The wipes are presaturated with a blend of 70% IPA and deionised water. Presaturated wipes ensure consistent saturation of each wipe independent of operator. Presaturated wipes can increase solvent control and accountability as well as reduce VOC emissions. The wipes are provided in convenient, easy to use peel and reseal pouches.

When used as a disinfectant, the IPA wipes are efficacious against bacteria in 1 min and yeasts in 3 mins. PROSAT Polynit Heatseal wipes are authorised for sale in the EU and United Kingdom under the EU and GB Biocidal Products Regulation.

PROSAT Polynit Heatseal Wipes are available sterile by gamma irradiation, validated per AAMI guidelines to a 10^{-6} SAL so can be used in the highest grade cleanrooms.

FEATURES	BENEFITS
Laundered knitted 100% polyester	• Extremely low levels of particle and fibres
Laser sealed edges	• Reduces fibre generation from the edge of the wipe
Available validated sterile	• Suitable for use in Grade A zones
Presaturated with 70% IPA and 30% DI water	• Convenient and easy to use, reduces VOC's • Controlled saturation levels and effective, fast-drying disinfection
Resealable pouch	• Easy to quickly remove wipes from pouch • Maintains saturation levels throughout use

Instructions for use

Contec PROSAT Polynit Heatseal Wipes with 70% IPA are ready-to-use.

When transferring the pouches to the point of use, remove each packaging layer as the environment becomes more critical.

Ensure the surface is uniformly covered with the solvent then wipe to dry with a Contec sterile cleanroom wipe.
