Chemoprotect® Prep mat

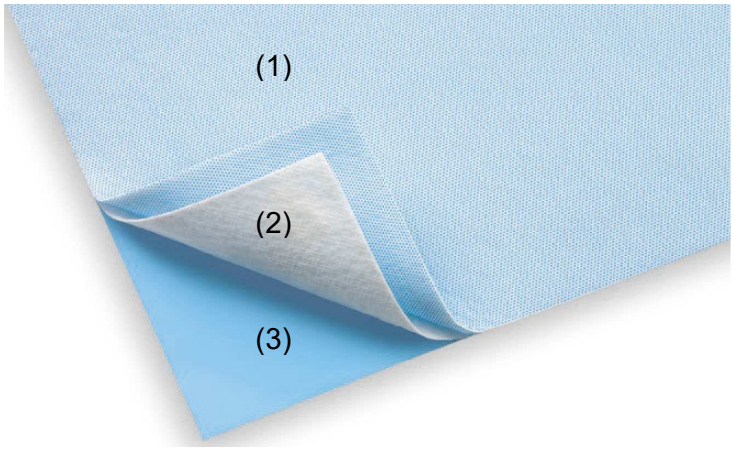

The Chemoprotect® Prep mat has been especially developed for the preparation of cytotoxic drugs. The three-layer structure of the material allows safe working and offers a workplace that is non-slipping and free from fluff. The Chemoprotect® Prep mats are very well suited for isolators respectively safety work benches. The fluid absorption of Chemoprotect® Prep mat minimises the risk of contaminations during regular handling of cytotoxic drugs as well as in case of spillage. Furthermore, it safeguards a subsequent disposal.

Product Specification

Material:

(1) Lint-free fluid-permeable upper layer surface (Polyethylene)
(2) Highly absorbent fluid-retaining middle layer (non-woven material, bleached virgin wood pulp)
(3) Non-slip lower layer, impermeable to fluids (Polyethylene)

Features:

Fluid-permeable surface, absorbent, fluid-receptive middle layer, fluid-impermeable, non-slip lower layer

Absorption of liquids:

≤ 950 ml/m² (absolute)
≤ 100 ml/Chemoprotect® Prep mat, small
≤ 200 ml/Chemoprotect® Prep mat, large
