CONSTIX® Sealed Foam Swab
SF-13ESD

Small pointed tip ESD sealed foam swab

CONSTIX® SF-13ESD static-safe swab consists of a pointed-tip sealed foam head attached to a conductive polymer handle.
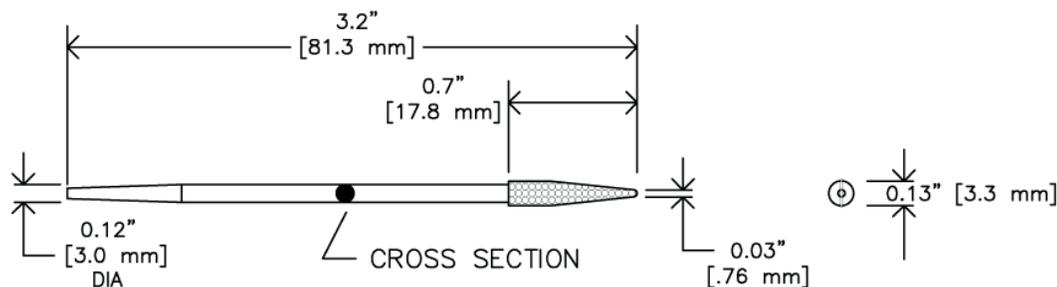

The foam head conforms tightly to the pointed shape of the swab handle to provide a very fine tip that enables access to small areas and crevices. The polyurethane foam head provides good particle entrapment and removal and is very low in particles and fibers.

The absorbent foam enables solvents, such as isopropanol and ethanol, to be readily sorbed for applications involving solvent delivery or removal. Though compatible with many common solvents, the SF-13ESD is not recommended for use with ketones such as acetone or MEK.

Features	Benefits
ESD handle	• Ideal for static-sensitive applications
Pointed fine tip	• Enables access to very small areas and crevices
