CONSTIX® Sealed Polyester Swab
SP-9

Small double layer sealed knitted polyester swab

CONSTIX® SP-9 sealed polyester swab consists of 100% knitted polyester fabric that is thermally bonded to a flex-tip polypropylene handle. The swab head is made of cleanroom laundered, double layer knitted microfiber polyester material. The polyester head is constructed without adhesives or binders, which makes the swab compatible with most common solvents, such as alcohols and ketones. The polypropylene handle has a thin, flexible tip that enables access to very small areas and components. The SP-9 swab is durable, absorbent and features extremely low particles and residue levels.

Features	Benefits
Sealed polyester head	• Provides enhanced sorbency, particle entrapment, and removal • Compatible with most common solvents, such as alcohols and ketones
Thin, flexible tip	• Enables access to very small areas and components
