Micronova®
MANUFACTURING INC.

Your strategic supplier for critical cleaning

PENS AND MARKERS FOR SUPERIOR DOCUMENTATION

Excellence in cleaning since 1984

Meeting requirements for Good Documentation Practices is imperative across controlled environments. From low sodium ink pens for Electronics/Semiconductor paper records to irradiated markers for labeling plastic, glass and paper in aseptic areas and RABS, we have the pens and packaging to meet your requirement.

Cleanroom Pens, Cleanroom Click Pens, IPA Resistant LabMarkers and Rollerball GelPens are available gamma irradiated – suited for Aseptic ISO 5, and other clean environments.

Cleanroom Pens

Cleanroom Pens feature a low-sodium, indelible ink and a special high-density poly barrel to limit particle generation.

Available in Black, Blue and Red.

Certified for Class 100.

Cleanroom Click Pens

Cleanroom Click Pens have the same clean, low sodium, indelible ink features as PEN-01 and PEN-02 (above) with an easy "click" retractable nib.

Available in black and blue ink.

Rollerball IPA Resistant GelPen – Irradiated

A fine point, archival ink gel pen for paper records.

Available in blue ink.

IPA-Resistant LabMarkers™

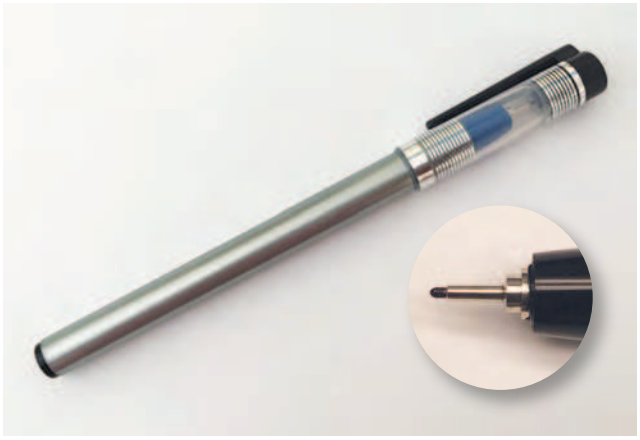
Lab Markers feature permanent, quick drying ink that leaves a clear impression on plastic bags or disposable labware. Has resistance to IPA overspray and smearing. Can be washed off with soap and water.

Sharpie® Fine Point Lab Markers

The industry standard, pen style permanent marker. Available in original"'capped" (above) and 'retractable' styles (below).

Sharpie® UltraFine Point Lab Markers

With the same industry standard permanent ink, this marker has an ultra fine tip for precise labeling and documentation. Capped. Available in blue or black ink.



UltraFine Smear-Proof Markers

A permanent marker that gives the thinnest permanent line at 0.3 mm. The quick dry ink works well with lab samples and slides, glass, plastic as well as paper. Long nib allows for writing in limited spaces.

Sharpie® Fine Point and Ultra Fine Point Markers are gamma irradiated – suited for Aseptic, ISO 5, and other clean environments.

Revision 001

CLEANROOM PEN

Product Specification

Product Name:	Cleanroom Pen
Manufacturer Part Number(s):	PEN-01, PEN-02, PEN-03
Description:	A low-sodium ink, capped ballpoint pen designed with a special poly barrel to limit particle generation. Manufactured at Micronova's Torrance, CA facility. Designed for clean and controlled environments.
Manufacturing Standards:	ISO 9001 Certified Facility
Physical Data:	
Materials of Construction:	
Barrel:	White high-density poly barrel
Ink:	Low-sodium ink PEN-01: black ink PEN-02: blue ink PEN-03: red ink
Dimensions:	
Length x Width:	5¾ in x ⅜ in
Nib:	0.7 mm
For Use with: (as needed)	Cleanroom documentation
Autoclavability:	Not autoclavable.
Chemical Compatibility:	Holds up to wipe down with IPA, bleach and phenols. Integrity of printed barrel will be compromised with thinners and strong solvents.
Packaging:	Packaged 10 pens per bag, and then double bagged.
Traceability:	Lot numbers printed on each outer bag and each case.
Certificates:	Certificate of Conformance available upon request.
